
Atlante continues its development in France and inaugurates a new generation charging station within the Odysseum shopping center (Montpellier)

Montpellier, 27 February 2024 – Atlante, the company of NHOA Group (NHOA.PA, formerly Engie EPS) dedicated to the creation of a fast and ultra-fast electric vehicle charging network for electric vehicles (EVs), announces today the opening and inauguration of its latest ultra-fast charging station in the Odysseum shopping center in Montpellier. Following a successful initial installation at the Grand Place shopping center in Grenoble, Atlante continues its development with Klépierre at the Odysseum shopping center.

Conveniently located at the heart of the Odysseum shopping center, this new Atlante station features state-of-the-art ultra-fast charging enabled by energy storage.

A first-of-a-kind station in France thanks to Atlante's cutting-edge technology

With over 12 million visitors a year, Odysseum, the Montpellier's shopping and leisure destination is the first among its peers to host Atlante's new generation charging station. This station is equipped with ultra-fast chargers from Italy's Alpitronic, is powered by a battery storage system developed by Sweden's Northvolt, Europe's leading battery manufacturer, and features Atlante's proprietary Energy Management System, which ensures seamless interaction between the grid and the storage system, while delivering hassle-free charging to Atlante's customers.

The station offers 8 charging points, each providing up to 150kW so that EV drivers can recharge 80% of their batteries in about 20 minutes, depending on the vehicle model. Beyond speed, thanks to the incorporation of storage, this new generation station optimizes the use of the power grid – a precious public infrastructure – and improves the station's economics, allowing electricity to be stored during off-peak hours and supplied during peak hours, thus ensuring users optimal rates while enjoying a smooth recharging experience.

The station is accessible to people with reduced mobility, open 24 hours a day, 7 days a week for all EV models, compatible with all charging standards, and available on all the main electric mobility apps.

Stefano Terranova, CEO of Atlante, states: " *We are thrilled to deploy our cutting-edge technology in partnership with a leading player like Klépierre, the European leader in shopping centers. This Atlante station equipped with an energy storage unit illustrates our ambition to contribute to the adoption of electric mobility in France and to accelerate the development of our pan-European network, which will include 5,000 charging points by 2025.*"

Jacques Galvani, CEO of Atlante France, adds: " *This new technology deployed by Atlante offers a significant competitive advantage to Odysseum's customers. It ensures optimal charging, powered 100% by renewable energies, at the best price at any time of day or night. We look forward to supporting Klépierre in its Act4Good™ sustainable development strategy.*"

Christel Garcia, Director of the Odysseum shopping center, asserts: " *With Atlante, we share a common vision for the future of mobility, based on innovation and sustainability. That's why we are delighted with this collaboration that offers a practical and ecological solution, meeting the needs of our visitors and more broadly, the challenges of our society. This is the spirit that drives our Act4Good™ CSR policy.*"

Low-consumption lighting, recycling, training of staff in eco-friendly actions... The ecological commitment of the Odysseum center is omnipresent.

The installation of this new generation Atlante station in the parking lot of the shopping center marks a new step in its sustainable approach and is part of the broader Act4Good™ sustainable development strategy of Klépierre.

The Klépierre group aims to net zero carbon in its shopping centers by 2030 and has already reduced the energy consumption of all its centers in Europe by almost 50% in less than 10 years.

The choice of Atlante's ultra-fast charging solutions ensures Odysseum customers an optimal EV charging experience - smooth, environmentally friendly, and ultra-fast. This new generation Atlante station at Odysseum, through incorporating energy storage, strengthens the common environmental goals with Klépierre, thus designing a more sustainable and accessible mobility for all.

Atlante

Atlante is a company of NHOA Group (NHOA.PA, formerly Engie EPS), global player in energy storage and e-mobility, which develops technologies enabling the transition towards clean energy and sustainable mobility, shaping the future of a next generation living in harmony with our planet.

Atlante is developing the largest fast and ultra-fast charging network in Southern Europe, 100% enabled by renewables, enhanced by energy storage and on-site photovoltaic. It aims to install in Italy, France, Spain and Portugal 5,000 fast and ultra-fast points of charge by 2025, and over 35,000 by 2030.

Operating since October 2021, Atlante has today more than 1,850 charging points online in its four countries with thousands more under construction and development. Leveraging on the technological heritage of the NHOA Group, including via collaboration with its sister company Free2move eSolutions, Atlante is a preferential network of the Stellantis automotive group and its customers. Atlante stations are fully interoperable and can be accessed by virtually any e-mobility app or charging card, and by any make and model of electric vehicles.

Odysseum

Odysseum, a unique concept in a dynamic and tourist-friendly city, is part of the development program for the southeast region of Montpellier. It fits into a commercial hub of incredible originality and strong attractiveness that welcomes 12 million visitors per year. Designed as a true "leisure" destination, the center is adjacent to a 60,000 m² entertainment area, offering numerous activities: an ice rink, aquarium, Gaumont multiplex, and planetarium, as well as a trampoline park. It features 124 shops and restaurants, set in ultra-modern, open-air decor. As an exciting place for exclusive shopping, discovery, and pleasure, Odysseum has already been awarded a "Mapic Award" for the best shopping center. The Odysseum destination is accessible in 10 minutes from the Place de la Comédie by tramway and has a second station - terminal, inside the center, or by the A709 highway. Visitors can also take advantage of the 8,000 parking spaces available at Odysseum. For more information, you can visit the official Odysseum website at: <https://odysseum.klepierre.fr>

Klépierre

Klépierre, the European leader in shopping centers, combines expertise in development, rental management, and asset management. The company's portfolio is valued at €19.3 billion as of December 31, 2023, and includes major shopping centers in more than 10 countries across continental Europe, attracting hundreds of millions of visitors each year. Klépierre holds a majority stake (56.1%) in Steen & Strøm, the leading Scandinavian real estate company specializing in shopping centers. Klépierre is a French Real Estate Investment Trust (SIIC) with shares traded on Euronext Paris, and it is a member of the CAC Next 20 and EPRA Euro Zone indices. It is also included in ethical indices such as the CAC 40 ESG, CAC SBT 1.5, MSCI Europe ESG Leaders, FTSE4Good, Euronext Vigeo Europe 120, and is listed on the CDP's "A List." These distinctions underline the Group's commitment to proactive sustainable development and the global leadership of the Group in the fight against climate change.
